PROFESSIONAL SUMMARY

Results-driven Computer Science and Engineering student with a strong foundation in Software Engineering and Full Stack Development. Proficient in building scalable web applications using Java, Python, JavaScript, React.js, Node.js, and SQL. Demonstrates strong problem-solving abilities utilizing Data Structures and Algorithms. Highly adaptable fast learner with excellent communication and team collaboration skills, experienced in integrating AI-powered features into modern software solutions.

TECHNICAL SKILLS

- **Programming Languages:** Java, Python, JavaScript, SQL, C
- **Frontend:** React.js, Next.js, HTML5, CSS3, Tailwind CSS, Responsive Web Design
- **Backend & Databases:** Node.js, Express.js, REST APIs, Authentication, JWT, MongoDB, MySQL
- **Tools & Concepts:** Data Structures & Algorithms, OOP, DBMS, Git, GitHub, Postman, VS Code

EDUCATION

Bachelor of Engineering in Computer Science and Engineering

Hindusthan Institute of Technology, Coimbatore, India

Expected: 2027

CGPA: 8.42 / 10.00

- **Core Coursework:** Data Structures, Object-Oriented Programming, Database Management Systems, Computer Networks, Software Engineering

INTERNSHIP EXPERIENCE

Software Engineering Intern

June 2025

APPIN Technology, Coimbatore, India

- Developed and deployed 4+ responsive web modules using Python, HTML5, CSS3, and JavaScript, improving application usability metrics by 25%.
- Collaborated with a cross-functional team of 5 developers in Agile development sprints to implement secure REST APIs and resolve application issues.
- Optimized backend database query execution and application performance through rigorous debugging, reducing API response times by 30%.

PROJECTS

SkillGap – AI-Based Skill Development Platform — *MERN Stack, REST APIs, JWT*

[\[GitHub\]](#)

- Architected a scalable MERN-stack platform enabling concurrent users to evaluate technical proficiencies via interactive assessments.
- Implemented secure JWT-based authentication protocols and optimized REST APIs for robust user profile management and data persistence.
- Designed an intelligent recommendation algorithm that maps skill gaps to targeted learning resources, elevating user engagement by 40%.

RepoVision – GitHub Repository Analytics Platform — *React.js, REST APIs, Tailwind CSS*

[\[GitHub\]](#)

- Engineered a full-stack repository analytics platform utilizing GitHub REST APIs to pull real-time data on commits, contributors, and repository stars.
- Built an interactive data visualization dashboard with reusable React.js components, enhancing client-side rendering performance by 35%.
- Developed mobile-first responsive interfaces across multiple breakpoints, ensuring high accessibility and cross-browser scalability.

Toonify – AI Image Transformation Application — *React.js, Cloud API Integration, Python*

[\[GitHub\]](#)

- Developed a high-performance image transformation application that processes photographic uploads into cartoon-style formats using AI pipelines.
- Engineered an automated image-processing pipeline with asynchronous API integration, slashing user workflow completion times by 50%.
- Implemented frontend performance optimization strategies, including lazy loading and image caching, reducing data payload overheads by 20%.

CERTIFICATIONS

- NPTEL Certifications: Programming in Java — Python for Data Science — Demystifying Networking
- freeCodeCamp: Certified Responsive Web Design
